An award-winning teacher, accomplished researcher, and experienced therapist, Ron Comer knows how to communicate the complexities of the abnormal psychology, to speak to the concerns of students, and to portray the real human impact of psychological disorders. With its signature integrated coverage of theory, diagnosis, and treatment, and remarkably inclusive cross-cultural perspective, this new edition of Comer's widely adopted textbook shows students where the study and treatment of psychological disorders stand today.

Taking a look at the field of abnormal psychology, including major theoretical models of abnormality, research directions, clinical experiences, therapies and controversies, this book covers personality disorders, the psychodynamic perspective, neuroscience, the 'empirically-based treatment' movement, and more.

This is a concise textbook on abnormal psychology that integrates various theoretical models, sociocultural factors, research, clinical experiences, and therapies. The author encourages critical thinking about the science and study of mental disorders and also reveals the humanity behind them.

Fully updated for DSM-5, this exciting revision complements the abnormal psychology course by providing 17 case histories based on the authors' clinical experiences. Each case study goes beyond DSM-5 diagnosis to describe the individual's history and symptoms, a theoretical discussion of treatment, a specific treatment plan, the actual treatment conducted, and assessment questions for students. The casebook also provides three "You Decide" cases -- written without diagnosis or treatment, so students can identify disorders and suggest appropriate therapies. This new edition adds assessment questions to the end of each case and also features three brand new cases: hoarding, somatic symptom disorder, and gender dysphoria.

Extensive updating throughout and a dramatically enhanced media and supplements package, including all new video case studies, makes this new edition of Abnormal Psychology the most effective yet.

This exciting new textbook for introductory psychology helps to open students' minds to the idea that psychology is all around us. Authors RON COMER and LIZ GOULD encourage students to examine what they know about human behaviour and how they know it; and open them up to an appreciation of psychology outside of the classroom. Psychology Around Us helps students see the big picture by stressing the interconnected nature of psychological science. Almost every chapter within this first edition helps open students' minds to comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday

individual differences and abnormal psychology that occur in that area. These "cut-across" sections highlight how the different fields of psychology are connected to each other and how they connect to everyday life. Every chapter begins with a vignette that shows the power of psychology in understanding a whole range of human behavior. This theme is reinforced throughout the chapter in boxed readings and margin notes that celebrate the extraordinary processes that make the everyday possible and make psychology both meaningful and relevant. The text presents psychology as a unified field the understanding of which flows from connecting its multiple subfields and reinforces the fact that psychology is a science with all that this implies (research methodology, cutting edge studies, the application of critical thinking).
