Android 11 contains a variety of great ways you can extend your app. Android 11 also includes behavior changes to improve battery life and security, and to enhance user privacy.Some of these behavior changes only affect apps that target Android 11, while others affect all apps when they are running on an Android 11 device, regardless of an app's targetSDKVersion.

Set up the Android 11 SDK | Android Developers

Configure Wear OS app dependencies. Configuring dependencies for a Wear OS module is similar to that of any other module. That is, they use the same dependency configurations, such as implementation and compileOnly. Wear modules also support variant-aware dependency management.As a result, if your base app module has a dependency on a Wear module, each variant of the base module consumes the ...
