This new edition, authored by three of the foremost scholars in nonverbal communication, builds on the approach pioneered by Burgoon, Buller and Woodall which focused on both the features and the functions that comprise the nonverbal signaling system.

Drawing significantly on both classic and contemporary research, Nonverbal Communication speaks to today's students with modern examples that illustrate nonverbal communication in their lived experiences. This new edition, authored by three of the foremost scholars in nonverbal communication, builds on the approach pioneered by Burgoon, Buller and Woodall which focused on both the features and the functions that comprise the nonverbal signaling system. Grounded in the latest multidisciplinary research and theory, Nonverbal Communication strives to remain very practical, providing both information and application to aid in comprehension.

Nonverbal Communication in Close Relationships provides a synthesis of research on nonverbal communication as it applies to interpersonal interaction, focusing on the close relationships of friends, family, and romantic partners. Authors Laura K. Guerrero and Kory Floyd support the premise that nonverbal communication is a product of biology, social learning, and relational context. They overview six prominent nonverbal theories and show how each is related to bio-evolutionary or sociocultural perspectives. Their work focuses on various functions of nonverbal communication, emphasizing those that are most relevant to the initiation, maintenance, and dissolution of close relationships. Throughout the book, Guerrero and Floyd highlight areas where research is either contradictory or inconclusive, hoping that in the years to come scholars will have a clearer understanding of these issues. The volume concludes with a discussion of practical implications that emerge from the scholarly literature on nonverbal communication in relationships – an essential component for understanding relationships in the real world. Nonverbal Communication in Close Relationships makes an important contribution to the development of our understanding not only of relationship processes but also of the specific workings of nonverbal communication. It will serve as a springboard for asking new questions and advancing new theories about nonverbal communication. It is intended for scholars and advanced students in personal relationship study, social psychology, interpersonal communication, nonverbal communication, family studies, and family communication. It will also be a helpful resource for researchers, clinicians, and couples searching for a better understanding of the complicated roles that nonverbal cues play in relationships.

"A collection of 52 previously published articles designed to serve as a textbook of an undergraduate course in nonverbal communication. Primarily focusing on research in the field of communication, the contributions are organized into sections on beginning perspectives, kinesic clues, appearance and adornment cues, contact codes, vocalics (the use of sound and silence), time and place codes, expressing emotion and intimacy, power and persuasion, creating impressions and managing interaction, and contemporary theory." -- c. Book News, Inc.

The Sourcebook of Nonverbal Measures provides a comprehensive discussion of research choices for investigating nonverbal phenomena. The volume presents many of the primary means by which researchers assess nonverbal cues. Editor Valerie Manusov has collected both well-established and new measures used in researching nonverbal behaviors, illustrating the broad spectrum of measures appropriate for use in research, and providing a critical resource for future studies. With chapters written by the creators of the research measures, this volume represents work across disciplines, and provides first-hand experience and thoughtful guidance on the use of nonverbal measures. It also offers research strategies researchers can use to answer their research questions; discussions of larger research paradigms into which a measure may be placed; and analysis tools to help researchers think through the research choices available to them. With its thorough and pragmatic approach, this Sourcebook will be an invaluable resource for studying nonverbal behavior. Researchers in interpersonal communication, psychology, personal relationships, and related areas will find it to be an essential research tool.

Performance creates a unique space for audience experience and influences how traditions, like the Gospels, are received and interpreted.

This Handbook provides a compendium of research methods that are essential for studying interaction and communication across the behavioral sciences. Focusing on coding of verbal and nonverbal behavior and interaction, the Handbook is organized into five parts. Part I provides an introduction and historic overview of the field. Part II presents areas in which interaction analysis is used, such as relationship research, group research, and nonverbal research. Part III focuses on development, validation, and concrete application of interaction coding schemes. Part IV presents relevant data analysis methods and statistics. Part V contains systematic descriptions of established and novel coding schemes, which allows quick comparison across instruments. Researchers can apply this methodology to their own interaction data and learn how to evaluate and select coding schemes and conduct interaction analysis. This is an essential reference for all who study communication in teams and groups.

This Handbook provides an up-to-date discussion of the central issues in nonverbal communication and examines the research that informs these issues. Editors Valerie Manusov and Miles Patterson bring together preeminent scholars, from a range of disciplines, to reveal the strength of nonverbal behavior as an integral part of communication.

Nonverbal Communication in Close Relationships provides a synthesis of research on nonverbal communication as it applies to interpersonal interaction, focusing on the close relationships of friends, family, and romantic partners. Authors Laura K. Guerrero and Kory Floyd support the premise that nonverbal communication is a product of biology, social learning, and relational context. Nonverbal Communication in Close Relationships makes an important contribution to the development of our understanding not only of relationship processes but also of the specific workings of nonverbal communication. It will serve as a springboard for asking new questions and advancing new theories about nonverbal communication. It is intended for scholars and advanced students in personal relationship study, social psychology, interpersonal communication, nonverbal communication, family studies, and family communication. It will also be a helpful resource for researchers, clinicians, and couples searching for a better understanding of the complicated roles that nonverbal cues play in relationships.

Fantastic! Mark Pope has capture a world of nonverbal communication, and helped Christian workers interpret what is begin said to them in a nonverbal way. While anyone in ministry will benefit from this book, technically every person alive needs to understand how to interpret people at two levels (i.e., what they say verbally and what they communicate nonverbally). Not only will they learn how to interpret others, perhaps they can learn how to better communicate their thoughts and ideas (Elmer L. Towns, cofounder, Liberty University). About the Book Have you ever wondered what was going on inside a person without asking? This book will help you to understand how recognize nonverbal communication, establish baseline behavior, and implement biblical mandates to help Gods people become all He desires. It will also allow you to connect with people in a significant way which will lead to long lasting relationships.

Every day, the human awakes to a new world, a new dawn and a new cascade of nonverbal communication. It may be the pleasant scent of a rose, the soft touch of a loved one, the sight of sun rays on a bedroom floor or the excited chatter of a child. Whatever form it takes, your environment and all who inhabit it send nonverbal signals all day long – even while they sleep. The Routledge Dictionary of Nonverbal Communication celebrates this communication, examining a very wide selection of nonverbal behaviors, actions and signals to provide the reader with an informed insight on the world around them and its messages. Compiled in the form of a dictionary, the book is presented as a series of chapters with alphabetical entries, ranging from attractiveness to zeitgeist. The book aims to provide the reader with a clear understanding of some of the relevant discourse on particular topics while also making it practical and easy to read. It draws on a wide selection of discourse from fields such as neuroscience, psychology, anthropology and psychiatry. The dictionary will be an essential companion for anyone wishing to understand nonverbal communication. It will also be especially useful for those working in the field of nonverbal communication.
