An innovative approach that focuses on taking great pictures not the inner workings of the camera * * Goes beyond a tour of the camera's capabilities to teach you how to take great photos with your Canon 50D! * Beautiful images, clear design, friendly and knowledgeable voice. * Not a rehash of the confusing, textbook-style camera manual (like so much of the competition) Canon's new EOS 50D bridges the gap between the novice and the seasoned pro with a perfect combination of high-speed and quality. For anyone who has upgraded from their point-and-shoot or first DSLR to a Canon 50D and wants to get the best shots possible but isn't sure what to do next. There's the manual of course, as well as competing books, and while they all tell 50D owners, often in 400+ pages, what the camera can do, none of them shows them exactly how to use their camera to create great images! Canon 50D: From Snapshots to Great Shots has one goal: to teach 50D owners how to make great shots using their Canon camera. It teaches them how to use their 50D to create the type of photographs that inspired them to buy the camera in the first place. Everything in the book is in service of creating a great image. Starting with the top ten things they need to know about their camera, photographer Jeff Revell then carefully guides them through the Basic modes and into the Advanced modes of the camera. They'll get practical advice from a pro on which settings to use when, great shooting tips, and even end-of-chapter assignments that will allow 50D owners to immediately put to use all the great info in each chapter.

Unlike a texty manual, this handy guide's main focus is on taking great pictures with the new 60D * *Goes beyond a tour of the camera's capabilities to teach you how to take great photos with the Canon EOS 60D! *Beautiful images, clear design, friendly and knowledgeable voice. *Not a rehash of the confusing, textbook-style camera manual (like so much of the competition) The successor to Canon's popular EOS 50D DSLR, the Canon 60D is a powerful camera intended for advanced amateurs to semi-professionals who want to jump into photography with the control and capabilities of a DSLR-- but without the high price. The 60D is slated for availability in late September 2010. Features include: * *18.0 Megapixel CMOS sensor. *ISO 100-6400 (expandable to 12800) for shooting from bright to dim light. *Improved EOS HD Video mode with manual exposure control, expanded recording, Movie Crop recording in 640x480, and more. *3.0-inch Clear View LCD monitor. *96% viewfinder coverage allowing users to see more of an image in the viewfinder -and much more!
