Mallorca VT is the Vino de la Tierra (VT) title covering most of the Spanish island of Mallorca (or Majorca), in the Mediterranean Sea. Today, Mallorca is perhaps best known as a tourist hub, for ...

With a growing interest on Jewish traditions, Bishop John Francis offers much-needed background on the significance of the Jewish tallit, or prayer shawl. In this short and right-to-the-point book, he shares the teaching he received that changed his prayer life. Key scriptures are presented that will link the prayer shawl with the power of God. Readers will discover its sacredness, role in prayer, symbolism, and application.

Conceptual Physics, Tenth Edition helps readers connect physics to their everyday experiences and the world around them with additional help on solving more mathematical problems. Hewitt's text is famous for engaging readers with analogies and imagery from real-world situations that build a strong conceptual understanding of physical principles ranging from classical mechanics to modern physics. With this strong foundation, readers are better equipped to understand the equations and formulas of physics, and motivated to explore the thought-provoking exercises and fun projects in each chapter. Included in the package is the workbook. Mechanics, Properties of Matter, Heat, Sound, Electricity and Magnetism, Light, Atomic and Nuclear Physics, Relativity. For all readers interested in conceptual physics.

VOCES DE HISPANOAMÉRICA, the market-leading anthology, features the most distinguished authors of Spanish-American literature from the pre-colonial period to the present. Introductory essays and literary selections, combined with many historical and literary references, make this text an invaluable resource. Through detailed essays that focus on each historical period, this 5th edition provides the necessary background information for you to effectively study, analyze, and evaluate literary works. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

While products such as bananas, pineapples, kiwifruit and citrus have long been available to consumers in temperate zones, new fruits such as lychee, longan, carambola, and mangosteen are now also entering the market. Confirmation of the health benefits of tropical and subtropical fruit may also promote consumption further. Tropical and subtropical fruits are particularly vulnerable to postharvest losses, and are also transported long distances for sale. Therefore maximising their quality postharvest is essential and there have been many recent advances in this area. Many tropical fruits are processed further into purees, juices and other value-added products, so quality optimization of processed products is also important. The books cover current state-of-the-art and emerging post-harvest and processing technologies. Volume 1 contains chapters on particular production stages and issues, whereas Volumes 2, 3 and 4 contain chapters focused on particular fruit. Chapters in Volume 2 review the factors affecting the quality of different tropical and subtropical fruits from açai to citrus fruits. Important issues relevant to each product are discussed, including means of maintaining quality and minimizing losses postharvest, recommended storage and transport conditions and processing methods, among other topics. With its distinguished editor and international team of contributors, Volume 2 of Postharvest biology and technology of tropical and subtropical fruits, along with the other volumes in the collection, will be an essential reference both for professionals involved in the postharvest handling and processing of tropical and subtropical fruits and for academics and researchers working in the area. Along with the other volumes in the collection, Volume 2 is an essential reference for professionals involved in the postharvest handling and processing of tropical and subtropical fruits and for academics and researchers working in the area. Reviews the factors affecting the quality of different tropical and subtropical fruits from açai to citrus fruits. Important issues relevant to each particular fruit are discussed, including means of maintaining quality and minimising losses postharvest, recommended storage and transport conditions
