A powerful and moving teen graphic novel memoir about immigration, belonging, and how arts can save a life--perfect for fans of American Born Chinese and Hey, Kiddo. For as long as she can remember, it's been Robin and her mom against the world. Growing up as the only child of a single mother in Seoul, Korea, wasn't always easy, but it has bonded them fiercely together. So when a vacation to visit friends in Huntsville, Alabama, unexpectedly becomes a permanent relocation--following her mother's announcement that she's getting married--Robin is devastated. Overnight, her life changes. She is dropped into a new school where she doesn't understand the language and struggles to keep up. She is completely cut off from her friends in Seoul and has no access to her beloved comics. At home, she doesn't fit in with her new stepfamily, and worst of all, she is furious with the one person she is closest to--her mother. Then one day Robin's mother enrolls her in a local comic drawing class, which opens the window to a future Robin could never have imagined.

"Based on an extraordinarily rich and varied collection of diaries, letters, and autobiographies of European Americans and African Americans, this book presents the voices and views of unpropertied, unprivileged people and sensitively probes the commonalities and differences in their experiences and perspectives. Hansen persuasively argues that recognizing the 'social' domain illuminates the agency of working people and dissolves the stereotypically gendered public/private dichotomy."--Nancy Grey Osterud, author of Bonds of Community "It is a pleasure to welcome Karen Hansen into the first rank of historical sociologists. In this superb model of scholarship, she leads us on an illuminating tour of the social life of literate working people in antebellum New England. Her arena is 'the social'--the territory that overlaps with private and public, where the dynamics of friendship, visiting, gossip, and collective worship combine to fashion many of life's great joys and sorrows. Best of all, she tells her story through the experiences of the people themselves. In a clear and honest way, Hansen manages to raise fundamental questions about perceived conceptions of gender, class, and the public-private dichotomy."--Neil J. Smelser, University of California, Berkeley "This wonderful book makes a real contribution to our understanding of the lives of women and men in antebellum New England. With its focus on people of modest means and its meticulous and insightful exploration of friendship, visiting, gossip, and church-going, Hansen's work refines and concretizes how we conceive the 'social.'"--Mary Ann Clawson, Wesleyan University "How refreshing it is to see someone address the big issues in sociology based on the experience of real people. Karen Hansen has valuable things to say about the limits of the public/private distinction and the importance of the social. Her book moves the discussion of these issues to a new level."--Alan Wolfe, author of The Human Difference

Hegel's Phenomenology of Spirit, the philosopher's first and perhaps greatest work, is the most important philosophical treatise of the nineteenth century. In this companion volume to his general introduction to Hegel, Tom Rockmore offers a passage-by-passage guide to the Phenomenology for first-time readers of the book and others who are not Hegel specialists. Rockmore demonstrates that Hegel's concepts of spirit, consciousness, and reason can be treated as elements of a single, coherent theory of knowledge, one that remains strikingly relevant for the contemporary discussion. He shows how the various conceptions of cognition developed in the text culminate in absolute knowing, which Rockmore reads, in opposition to the frequent religious readings of Hegel, in a wholly secular manner. Unlike commentators who isolate Hegel's text from its philosophical origins, Rockmore analyzes the book in the philosophical context from which it emerged, lucidly discussing notoriously difficult passages in relation to the ideas of Aristotle and Descartes, and above all to those of Kant and other German idealists. Faced with the decline of the traditional family and the explosive growth of the over-65 population, the Japanese are looking for new ways to care for their elders. This timely study documents the birth of a major social phenomenon in Japan/the planned retirement community. In the mid-1980s, Yasuhiro Kinoshita spent a year living in Japan's first such community, Fuji-no-Sato. His collaboration with Christie W. Kiefer, a cultural gerontologist, is the first detailed study of a retirement community in a non-Western culture. Fuji-no-Sato is a social community with no visible traditions. Kinoshita and Kiefer show that its residents' preference for long-established relationships creates the need for the invention of relationships that have no precedent in Japanese society. This book reveals much about Japanese culture, and about the "graying of society" that plagues the newly industrialized countries of Asia. Its lessons about sensitivity to the elderly's values and the need for clear communication have important applications in other cultures as well.

The book describes the errors that people commonly make in dealing with probabilities. They include both the errors that are now well recognised like overconfidence, and the errors that investigators may themselves introduce without realising it.

A highly sophisticated and convincing attempt to defend the notion of God as a non-physical, spiritual reality.
