What Is Opposition Research? Understanding the Tactics ...

In politics, opposition research is the practice of collecting information on a political opponent or other adversary that can be used to discredit or otherwise weaken them. The information can include biographical, legal, criminal, medical, educational, or financial history or activities, as well as prior media coverage, or the voting record of a politician. Opposition research can also entail using "trackers" to follow an individual and record their activities or political speeches. In advance

From a campaign operative and former staff member for President Obama, this brilliant dissection of modern politics is the first book to explain how political opposition research is done -- and why it matters. In the vein of Michael Lewis' *Liar's Poker* and Mark Leibovich's *This Town*, *Black Arts* is the first-person narrative of a well-placed insider revealing the workings in a part of society that is as influential and powerful as it is unfamiliar. You'll meet irreverent trash-talking campaign hacks and ordinary citizens volunteering in the "Resistance," ride the ups and downs of an underdog Presidential campaign, and navigate through the fog generated by Trump's political machine. John Burton shares the nitty-gritty details of how he finds and disseminates information and along the way, tell stories -- some sobering, some hilarious -- that have never been publicly told. In our current moment of rising populism and distrust of institutions like "the media" and "the political establishment," the lack of knowledge about how these institutions work becomes the vacuum in which distrust and conspiracy theories flourish. By offering a crystal-clear account of exactly how political campaigns and journalists interact, Burton interrogates the "fake news" debate, showing that a certain strain of populism grows stronger when we don't understand how politics works. *The Black Arts* will empower the American people to participate in politics. Unafraid to "go low", *The Black Arts* describes in unforgettable detail what it takes to win an election. John Burton also has a powerful personal story. Growing up a black gay kid in working class Miami, he traced a path from the margins of our society through some of America's most elite institutions of education, influence, and power. Perhaps the unlikeliest of political operatives, John Burton is an outsider's insider.

A guide that Marcus Cicero's brother wrote for him as he prepared to campaign for consul in ancient Rome includes a surprising amount of information that can be applied to today's political contests, and is now presenting again, in a bilingual Latin-English edition that offers a new translation.

Peter van Bergeijk brings together 40 leading experts from all continents to analyze state-of-the-art data covering the sharp increase in (smart) sanctions in the last decade. Original chapters provide detailed analyses on the determinants of sanction success and failure, complemented with research on the impact of sanctions.

The SAGE Handbook of Political Science presents a major retrospective and prospective overview of the discipline. Comprising three volumes of contributions from expert authors from around the world, the handbook aims to frame, assess and synthesize research in the field, helping to define and identify its current and future developments. It does so from a truly global and cross-area perspective. Chapters cover a broad range of aspects, from providing a general introduction to exploring important subfields within the discipline. Each chapter is designed to provide a state-of-the-art and comprehensive overview of the topic by incorporating cross-cutting global, interdisciplinary, and, where this applies, gender perspectives. The Handbook is arranged over seven core thematic sections: Part 1: Political Theory Part 2: Methods Part 3: Political Sociology Part 4: Comparative Politics Part 5: Public Policies and Administration Part 6: International Relations Part 7: Major Challenges for Politics and Political Science in the 21st Century

*We're With Nobody* is a thrilling, eye-opening insider's view of a little-known facet of the political campaign process: the multi-million dollar opposition

research industry, or “ oppo ” as it ’ s called. For sixteen years authors Alan Huffman and Michael Rejebian have been digging up dirt on political candidates across the country, from presidential appointees to local school board hopefuls. *We're With Nobody* is a fascinating, riveting, sometimes funny, sometimes shocking look at the unseen side of political campaigning—a remarkable chronicle of a year in the life of two guys on a dedicated hunt to uncover the buried truths that every American voter has a right to know.

This book takes a closer look at the role and meaning of political opposition for the development of democracy across sub-Saharan Africa. Why is room for political opposition in most cases so severely limited? Under what circumstances has the political opposition been able to establish itself in a legitimate role in African politics? To answer these questions this edited volume focuses on the institutional settings, the nature and dynamics within and between political parties, and the relationship between the citizens and political parties. It is found that regional devolution and federalist structures enable political opposition to organize and gain local power, as a supplement to influence at the central level. Generally, however, opposition parties are lacking in organization and institutionalization, as well as in their ability to find support in civil society and promote the issues that voters find most important. Overall, strong executive powers, unchecked by democratic institutions, in combination with deferential values and fear of conflict, undermine legitimate opposition activity. This book was originally published as a special issue of *Democratization*.
