Space Almanac: Thousands of Facts, Figures, Names, Dates ...

There are more stars in space than there are grains of sand in the world. There are 10 times more stars in the night sky than grains of sand on the Earth, with 70 sextillion stars being visible from Earth through a telescope. To put that in numbers, 70 sextillion is this: 70,000,000,000,000,000,000.

The largest, most complete and up to date almanac of space exploration is now in its second big edition! Here at your fingertips is the latest information on almost anything you want to know about who's doing what in space.

What are the names of the moons of Uranus newly-discovered by Voyager 2? Who was the first physician to make house calls at a space station? Could moon dust fuel nuclear fusion power plants? This book looks at these and other questions, as well as documenting the history of space exploration. The book includes sections on astronauts and cosmonauts, space stations, space shuttles, rockets, satellites, the solar system and deep space.

Presents lessons on using an almanac.

Lists news events, population figures, and miscellaneous data of an historic, economic, scientific and social nature.

Lists news events, population figures, and miscellaneous data of an historic, economic, scientific and social nature.
