This is at once a playful text with a serious purpose: to provide the reader with the theoretical lenses to analyze the dynamics of social class. It will appeal to students, and indeed anyone interested in how class mediates relationships in higher education, both because of its engaging tone, and because it uses the college campus as a microcosm for observing and analyzing the concept of class – and does so in a way that will prompt the reader to reflect on her or his location in the continuum of class, and understand how every member of the campus community helps co-construct social class. Will Barratt starts from the premise that there is more than one way to study any idea; and that the more tools we use to examine a concept, the more fully we understand it in all its complexity and ambiguity. To illustrate salient features of class on campus, he introduces five fictional European-American women – Whitney Page, Louise, Misty, Ursula, and Eleanor – and also includes the real stories of students who represent a diversity of backgrounds. Social class is often neglected or ignored as an important issue in the lives of students. The book provides the reader with a language for analyzing class, with theories of class that go beyond standard economic and sociological models, and examples of the manifestation of class – all toward the end of helping the reader have more agency in working with this difficult and challenging concept. This book is suitable for students going to college for the first time, for courses exploring multicultural issues in contemporary society, and for anyone professionally involved with students. Each chapter includes a suggested experience and reflection questions to prompt readers to explore their thinking and feeling about class, as well as class discussion questions.

On October 1, 1962, James Meredith was the first African American student to enroll at the University of Mississippi. Preceded by violent rioting resulting in two deaths and a lengthy court battle that made it all the way to the Supreme Court, his admission was a pivotal moment in civil rights history. Citing his "divine responsibility" to end white supremacy, Meredith risked everything to attend Ole Miss. In doing so, he paved the way for integration across the country. Originally published in 1966, more than ten years after the Supreme Court ended segregation in public schools in Brown v. Board of Education, Meredith describes his intense struggle to attend an all-white university and break down long-held race barriers in one of the most conservative states in the country. This first-person account offers a glimpse into a crucial point in civil rights history and the determination and courage of a man facing unfathomable odds. Reprinted for the first time, this volume features a new introduction by historian Aram Goudsouzian.

Cricket on Everest starts with an idea over a pint of beer and ends with a world record at 5,165 metres above sea level. In 2009, 50 people from the UK, many of whom had never met until a year earlier, played the highest ever game of cricket on the slopes of the world's tallest mountain. The idea captured the imagination of people around the globe, making front page news in several countries; being followed by millions through daily TV news updates and raising more than £100k for charity. What people did not see, however, was what happened behind the scenes. The book details several near-misses that the organisers kept quiet – including securing permission to enter the National Park where Everest is situated just a day before the group were due to arrive. Friendships were pushed to the very limit and many people gave their all to organise a once-in-a-lifetime experience. The heartache from several people dropping out of the expedition was counteracted by the highs of taking part in such a unique and life-changing experience. Ultimately, this a story of 50 people going outside of their comfort zones to achieve something many thought impossible. It brought people and communities together, changed the lives of many and reminded everyone that adventure is accessible to anyone. Cricket on Everest will appeal to fans of sport and travel writing. Author Alan has been inspired by Harry Thompson's Penguins Stopped Play and Jon Krakauer's Into Thin Air.
