Our willpower is limited, yet we rely on it every day to get our tasks done. Even if we build willpower slowly over time, it's never enough to reach all of our goals. The solution lies in habit creation, the method by which we transform hard tasks into easy ones, making them automatic and independent of our will power. Each of us has millions of habits, in how we do our work, interact with others, perceive the world, and think about ourselves. Left unexamined, these habits are just as likely to hinder our progress as they are to push it along. Without a deliberate system for building habits, we become our own worst enemy. Superhuman by Habit examines habit building in depth. It covers the principles and philosophies of habit building, as well as the practical nuts and bolts implementing those habits. The second half of the book is dedicated to specific habits in every major area of life, covering the pros and cons of each, the path to implementing them, and specific notes about each one.

Scientists today working on controversial issues from climate change to drought to COVID-19 are finding themselves more often in the middle of deeply traumatizing or polarized conflicts they feel unprepared to referee. It is no longer enough for scientists to communicate a scientific topic clearly. They must now be experts not only in their fields of study, but also in navigating the thoughts, feelings, and opinions of members of the public they engage with, and with each other. And the conversations are growing more fraught. In Getting to the Heart of Science Communication, Faith Kearns has penned a succinct guide for navigating the human relationships critical to the success of practice-based science. This meticulously researched volume takes science communication to the next level, helping scientists to see the value of listening as well as talking, understanding power dynamics in relationships, and addressing the roles of trauma, loss, grief, and healing.

What does it take to win success and influence? Some people think that in today's hyper-competitive world, it's the tough, take-no-prisoners type who comes out on top. But in reality, argues New York Times bestselling author Dave Kerpen, it's actually those with the best people skills who win the day. Those who build the right relationships. Those who truly understand and connect with their colleagues, their customers, their partners. Those who can teach, lead, and inspire. In a world where we are constantly connected, and social media has become the primary way we communicate, the key to getting ahead is being the person others like, respect, and trust. Because no matter who you are or what profession you're in, success is contingent less on what you can do for yourself, but on what other people are willing to do for you. Here, through 53 bite-sized, easy-to-execute, and often counterintuitive tips, you'll learn to master the 11 People Skills that will get you more of what you want at work, at home, and in life. For example, you'll learn: · The single most important question you can ever ask to win attention in a meeting · The one simple key to networking that nobody talks about · How to remain top of mind for thousands of people, everyday · Why it usually pays to be the one to give the bad news · How to blow off the right people · And why, when in doubt, buy him a Bonsai A book best described as "How to Win Friends and Influence People for today's world," The Art of People shows how to charm and win over anyone to be more successful at work and outside of it.

Explains how to achieve personal and professional goals by building close, trusting relationships with others that help facilitate creative feedback, encouragement, and long-term success.

We can teach the blind to see. Your third eye and sixth sense are very real. In Indonesia, they released a system that rehabilitates the blind. Not only in Indonesia but all around the world people are rediscovering what may very well be the origin of all religions. You can look through time and get the right answer to any question. You can access any information off of any storage device. You can teach others their intuition, inner energy, and internal sight. This book is meant to preserve and share sacred and hidden knowledge that can truly change the world as we know it. This is the greatest and most pertinent thing that we should be focusing on. Life as we know it is far more magical than we thought. I will teach you everything you need to know to learn to see without your eyes and prove that the laws of physics may not be as complete as we thought. We will be going over important topics like breathwork, meditation, chakras, inner energy, and the science behind it all. In this book, we go over the meaning of life as described in the Tree of life. We talk about real Enlightened Masters who have conquered death and transcended into an eternal life of non-duality. Immortals are real. There are people hundreds and thousands of years old who walk the earth today. Jesus is one of them. I talk about the blood we found on the Ark of the Covenant and how it proves immortality and even further backs up stories of Jesus as a man, alive and walking the earth today. I truly hope and believe that this book and the ones to follow have the potential to change the world. We are all capable of so much more than we are lead to believe. Levitation, teleportation, walking on water, and true manifestation are all possible. It's crazy how many myths were actually based on fact and we simply couldn't believe the truth they were telling us. In order to get a grasp of the ideas in this book you first need to understand three basic things. Number one; all points in space and time are one. This is why remote viewing is even possible. Number two, everything is energy, nothing is matter. Even at the smallest levels of our physical world we only find dense energy fields, and nothing truly physical. And number three, Consciousness is the basis for all. These three Ideas will help you grasp an understanding of the physics of spirituality. For everything is spirit in reality. In this book, I will share with you sacred and hidden knowledge that clearly shows us the path to enlightenment. And Enlightenment turns out to be Immortality in life, not after death. You can in fact grow younger and develop energetic protection that can stop a speeding car. In cultures around the world the stories match up and we learn vital details from each one. So much of this knowledge has been intentionally kept secret and jealously guarded. Not only has our CIA been exploring these esoteric phenomena, but cultures around the world still hold true to ancient ways. You would never guess that the Pyramids, Fung Shui, and our Chakras have anything in common, but it isn't until we develop our energetic senses, that these things become apparent. I will teach you everything I know. This Journey is a long one filled with many things that modern man simply would not believe until he confronted them face to face. With this book, I hope to share the knowledge that's needed to raise the next generation of extremely psychic children to lead us into the perfect world I know is possible. Love is always the answer. Be the change you want to see. Let's change the world.-Robert Smithblindfoldedsight.com
