The World Trade Organization (WTO) is an intergovernmental organization that is concerned with the regulation of international trade between nations. The WTO officially commenced on 1 January 1995 under the Marrakesh Agreement, signed by 123 nations on 15 April 1994, replacing the General Agreement on Tariffs and Trade (GATT), which commenced in 1948. It is the largest international economic organization in the world.

An examination of China ’ s participation in the World Trade Organization, the conflicts it has caused, and how WTO reforms could ease them China ’ s accession to the World Trade Organization (WTO) in 2001 was rightly hailed as a huge step forward in international cooperation. However, China ’ s participation in the WTO has been anything but smooth, with China alienating some of its trading partners, particularly the United States. The mismatch between the

WTO framework and China ' s economic model has undermined the WTO ' s ability to mitigate tensions arising from China ' s size and rapid growth. What has to change? China and the WTO demonstrates that unilateral pressure, by the United States and others, is not the answer. Instead, Petros Mavroidis and André Sapir show that if the WTO enacts judicious reforms, it could induce China ' s cooperation, leading to a renewed confidence in the WTO system. The WTO and its predecessor, the General Agreement on Tariffs and Trade, are predicated on liberal domestic policies. They managed the previous accessions of socialist countries and big trading nations, but none were as large or powerful as China. Mavroidis and Sapir contend that for the WTO to function smoothly and accommodate China ' s unique geopolitical position, it needs to translate some of its implicit principles into explicit treaty language. To make their point, they focus on two core complaints—that Chinese state-owned enterprises (SOEs) benefit from unfair trade advantages, and that domestic companies, private as well as SOEs, impose forced technology transfer on foreign companies as a condition for accessing the Chinese market—and they lay out specific proposals for WTO reforms. In an age of global trade disputes, China and the WTO offers a timely exploration of unprecedented challenges to the current multilateral system and fresh ideas for lasting solutions.

If ever there existed a benign-sounding organisation, it is surely the World Trade Organisation. The WTO is the successor to GATT. According to the WTO itself, its mission is "dealing with the rules of trade between nations. At its heart are the WTO agreements, the legal ground-rules for international commerce and for trade policy. The agreements have three main objectives: to help trade flow

as freely as possible; to achieve further liberalisation gradually through negotiation; and to set up an impartial means of settling disputes". This book seeks to illuminate some key issues related to the WTO as well as present a detailed bibliography for future reference.

This comprehensive account of the establishment of the WTO focuses on those who shaped its creation as well as those who have influenced its evolution. It also examines trade negotiations, the WTO's dispute settlement role, the process of joining, and what lies ahead for the organization.

The WTO plays an important role in supporting efforts to achieve international regulatory cooperation (IRC) and to facilitate trade. First, the WTO provides a multilateral framework for trade among its 164 members, with a view to ensuring that trade flows as smoothly, predictably and freely as possible. Second, the WTO ' s Agreements provide important legal disciplines, helping to promote good regulatory practice and IRC at the domestic level as a means of reducing unnecessary barriers to trade. This publication highlights how the WTO ' s Agreements on Technical Barriers to Trade (TBT) and on the Application of Sanitary

and Phytosanitary Measures (SPS) and the work of their related Committees promote opportunities for regulatory cooperation among governments and ease trade frictions. It demonstrates how members' notification of draft measures, harmonisation of measures with international standards, discussion of specific trade concerns and other practices help to facilitate global trade in goods. The study also makes recommendations on how to benefit further from the transparency and cooperation opportunities provided by the TBT and SPS Agreements.

Trade Diplomacy Transformed: Why Trade Matters for Global Prosperity reveals how three major transformations over the past two centuries in how and why trade diplomacy is done have shaped the essential movement of goods, services, capital and labour across borders, as buyers and sellers meet in the global marketplace. Beginning with the intimately linked origins of diplomacy and international trade in ancient history, the narrative explores the tariff negotiations that first liberalized international trade in the nineteenth century, the emergence and growth of institutions like the European Union and the World Trade Organization, and the recent rapid explosion in the diplomacy of trade dispute resolution. In its provocative conclusion, Trade Diplomacy Transformed argues that, if it is to remain effective as a venue for the globe's trade diplomacy, the WTO must reform itself to become more like the EU.

The multilateral trading system stands at a crossroads. Despite its widely acknowledged contribution to global prosperity over the past half century, the movement toward

further liberalization has increasingly been challenged. These essays by leading scholars and trade officials honor Raymond Vernon, one of the architects of the international economic institutions established following the Second World War. The book examines several key issues at the heart of the debate over the multilateral trading system. What are the global efficiency gains from further liberalization? How can efficiency gains be maximized while respecting legitimate claims to sovereignty? Is the trading system affording an equitable distribution of benefits between countries and among various groups within societies? Does civil society have a role in the trading system? What role should the World Trade Organization and its dispute settlement procedures play in resolving disputes and enhancing legitimacy?
